

Roxana Popa

Senior Software Engineer

Bucharest, Romania

+40 737 803 595

roxanapopa113@gmail.com

Combining strong technical skills with Agile leadership, I deliver high-quality, secure, and scalable software solutions. Experienced in all phases of the software development lifecycle, and across various industries, including healthcare, hospitality, banking and communications; experience integrating generative AI tools into the development workflow to prototype ideas, investigate complex issues, and explore design and architectural alternatives

Skills

C#, .NET Core, Entity Framework, SQL, Git, Azure, Unit Testing, TDD, Scrum, Angular, TypeScript, JavaScript, HTML, CSS, MVC, SOA, Microservices, Modular Monolith

Languages

Romanian (native) · English · French · Dutch

Employment History

Senior Software Developer at Bestmix, Bucharest

November 2024 - Present

- Designing and developing cloud-based Recipe Management software (Azure, .NET) for the food and feed industry, ensuring accuracy, compliance, scalability, and secure handling of complex product formulations.
- Applying SOLID principles and comprehensive unit testing to deliver maintainable, production-ready code.
- (Temporarily) Acting as Scrum Master for one of three large development teams working on the Recipe Management product: facilitating ceremonies, supporting backlog refinement, coaching the team in Agile practices, and ensuring alignment with product goals.
- Collaborating with business stakeholders and cross-functional teams to translate requirements into technical solutions, improving usability and efficiency for end-users.

Technologies: C#, .NET Core, Azure, SQL, LLBLGEN, Unit Testing, Scrum, Modular Monolith

Senior Software Developer at Suvoda, Bucharest (remote from Breda)

October 2022 - March 2024

- Designed, developed, built and provided support for a critical clinical trial software system, prioritizing patient safety and data integrity.
- Reviewed and assessed impact and feasibility of product requirements to guarantee successful implementation within the project scope and Program Increment boundaries.
- Collaborated on creating detailed technical design and implementation documentations.
- Delivered high-quality code, wrote unit tests and worked with the team to ensure high-quality deliverables, collaborated with colleagues, and managed deployments to deliver robust software across environments.

Technologies: C#, .NET Core, SQL, Entity Framework, KendoUI, Unit Testing, Elastic Search, Docker, CQRS, Scrum, Microservices, Modular Monolith

Senior Software Engineer at Team Rockstars IT, 's-Hertogenbosch

June 2020 - July 2022

- Contributed to Internal COVID Response: developed a web application (Azure) for employee office reservations, lunch planning, and parking management during the COVID-19 crisis.
- Helped develop an internal web application for managing talent profiles.

Senior Software Developer | Scrum Master at CM.com, Breda

June 2019 - October 2019

- Facilitated Agile adoption: guided development teams in implementing Scrum practices, focusing on goal alignment and stakeholder engagement.
- Designed and implemented secure RESTful APIs (.NET Core) adhering to best practices, SOLID coding and clean architecture principles.
- Provided high-quality fixes for production issues.

Technologies: C#, .NET Core, SQL, Entity Framework, Unit Testing, Docker, Scrum

Software Developer | Scrum Master at Amadeus Hospitality, Breda

April 2018 - May 2019

- Facilitated Scrum practices, coached the team and empowered them to become self-organizing; supported backlog refinement and participated in ART ceremonies.
- Collaborated with developers to implement DevOps practices, improved CI/CD pipelines (Azure DevOps, ARM templates), and enhanced code quality (unit, integration, and acceptance tests using xUnit, SpecFlow).
- Developed and implemented RESTful APIs using .NET Core to integrate with external payment providers; ensured security (JWT tokens) and application monitoring (Application Insights).
- Improved code maintainability and testability by applying SOLID principles, refactoring existing code, and extracting reusable components.

Technologies: C#, .NET Core, Azure, SQL, Entity Framework, Azure Queue, Service Bus, AppInsights, Angular, Typescript, KnockoutJS, Unit Testing, Scrum, SAFe, Microservices

Software Engineer at BNP Paribas, Bucharest

September 2017 - March 2018

- Developed & implemented web services (WCF, RESTful) for Ekspres Bank (Denmark) at BNP Paribas Shared Service Center (Bucharest).
- Applied SOLID principles and SOA best practices within a complex, legacy-modern system.
- Improved CI/CD pipelines aligning with the bank's DevOps strategy (Atlassian Bamboo, xUnit).

Technologies: C#, .NET Framework, SQL, HTML, CSS, Javascript, Typescript, Angular, Unit Testing, Scrum, SOA, Microservices

Software Engineer at RES Software, Bucharest

April 2014 - March 2017

- Full-stack development and maintenance for enterprise applications including RES ONE Service Store (Identity Director) and RES ONE Workspace products.
- Supported a 2 million+ user base through third-line support and maintenance of legacy and modern web solutions.
- Acted as a backup team lead, facilitating communication and fostering collaboration across stakeholders.
- Provided maintenance and troubleshooting expertise for a cutting-edge identity and service management platform.

Technologies: C#, .NET Framework, VB6, C++, Typescript, Javascript, jQuery, KnockoutJS, RabbitMQ, Scrum

Education & Internships

- Graduated with a Bachelor of Science degree in Computer Science - Faculty of Mathematics and Computer Science, University of Bucharest.
 - Junior Software Developer (C/C++), Unidec Computer Systems, Bucharest - July 2007 - March 2010
 - Software Developer, ENEA, Bucharest - April 2010 - September 2011

- Master's Program in Computer Science (no degree obtained), LIACS (Leiden University), Leiden - October 2011 - December 2013.
 - Teaching Assistant, LIACS (Leiden University), Leiden - January 2012 - March 2012
 - Software Developer Intern, Intel, Munich - May 2012 - October 2012
 - Software Developer Intern, ChipSoft, Amsterdam - December 2012 - November 2013
